SATTERLY, John [Professor, Dept. of Physics] January, March 1919 (051)

260

January 8th, 1914

Professor John Satterly,

University of Toronto.

Dear Dr. Satterly:

I am sending you a letter to Sir Oliver Lodge which you may enclose with your application.

Yours sincerely,

President.

January 8th, 1919

Sir Oliver Lodge,

Vice-Chancellor of the University of Birmingham,

Birmingham, England.

My dear Sir Oliver:

Professor John Satterly of the Physics department of the University is I understand applying for the vacant professorship in the University of Birmingham and he has asked me to give him a statement which he may enclose with his formal application.

Dr. Satterly has been in the University for years and has given very hard work and satisfactory service to the University during that period. He is a good teacher. Professor Nelemann regards him as a good administrator of his undergraduate laboratory, and he is an indefatigable worker.

I should be sorry to see Professor Satterly leave the University, though of course if he were to receive the appointment of which you have sent me notice I should be glad for him to receive the promotion which this would involve.

With kind regards, I am,

Yours sincerely,

President.

University of Toronto
TORONTO, CANADA

DEPARTMENT OF PHYSICS

240

Mar 18. 1919

The President

Dear Sir

I hope to go to England with my wife and children this summer, and I should like to get away early. Would it be possible to have my examination papers placed early in the time-table and could I leave as soon as they were marked?

Yours sincerely

John Satterly.

March 20th, 1929

Professor John Cassidy,
Department of Physics,
University of Toronto.

Dear Professor Cassidy:

I have spoken to Dr. Webber and asked him to have an exact examination as early as possible, which he says he will do. In any case they will all be over by the end of May. Perhaps you would mention a date at which you would like to get away.

Yours sincerely,

President.
